Virtual Guard Tour Services - 30 SGD Per Month

This document outlines the details of our virtual guard tour services, offered at a competitive price of 30 SGD per month. It describes the features, benefits, and implementation of this service, designed to enhance security and provide verifiable proof of patrols without the need for physical guards on-site at all times. This cost-effective solution is ideal for businesses and property owners seeking to improve security measures and ensure accountability.

Introduction to Virtual Guard Tours

Traditional security guard patrols can be expensive and, at times, unreliable. Our virtual guard tour service offers a modern, technology-driven alternative that provides enhanced security and verifiable proof of patrols at a fraction of the cost. By leveraging mobile technology and cloud-based reporting, we provide a comprehensive security solution that is both effective and affordable.

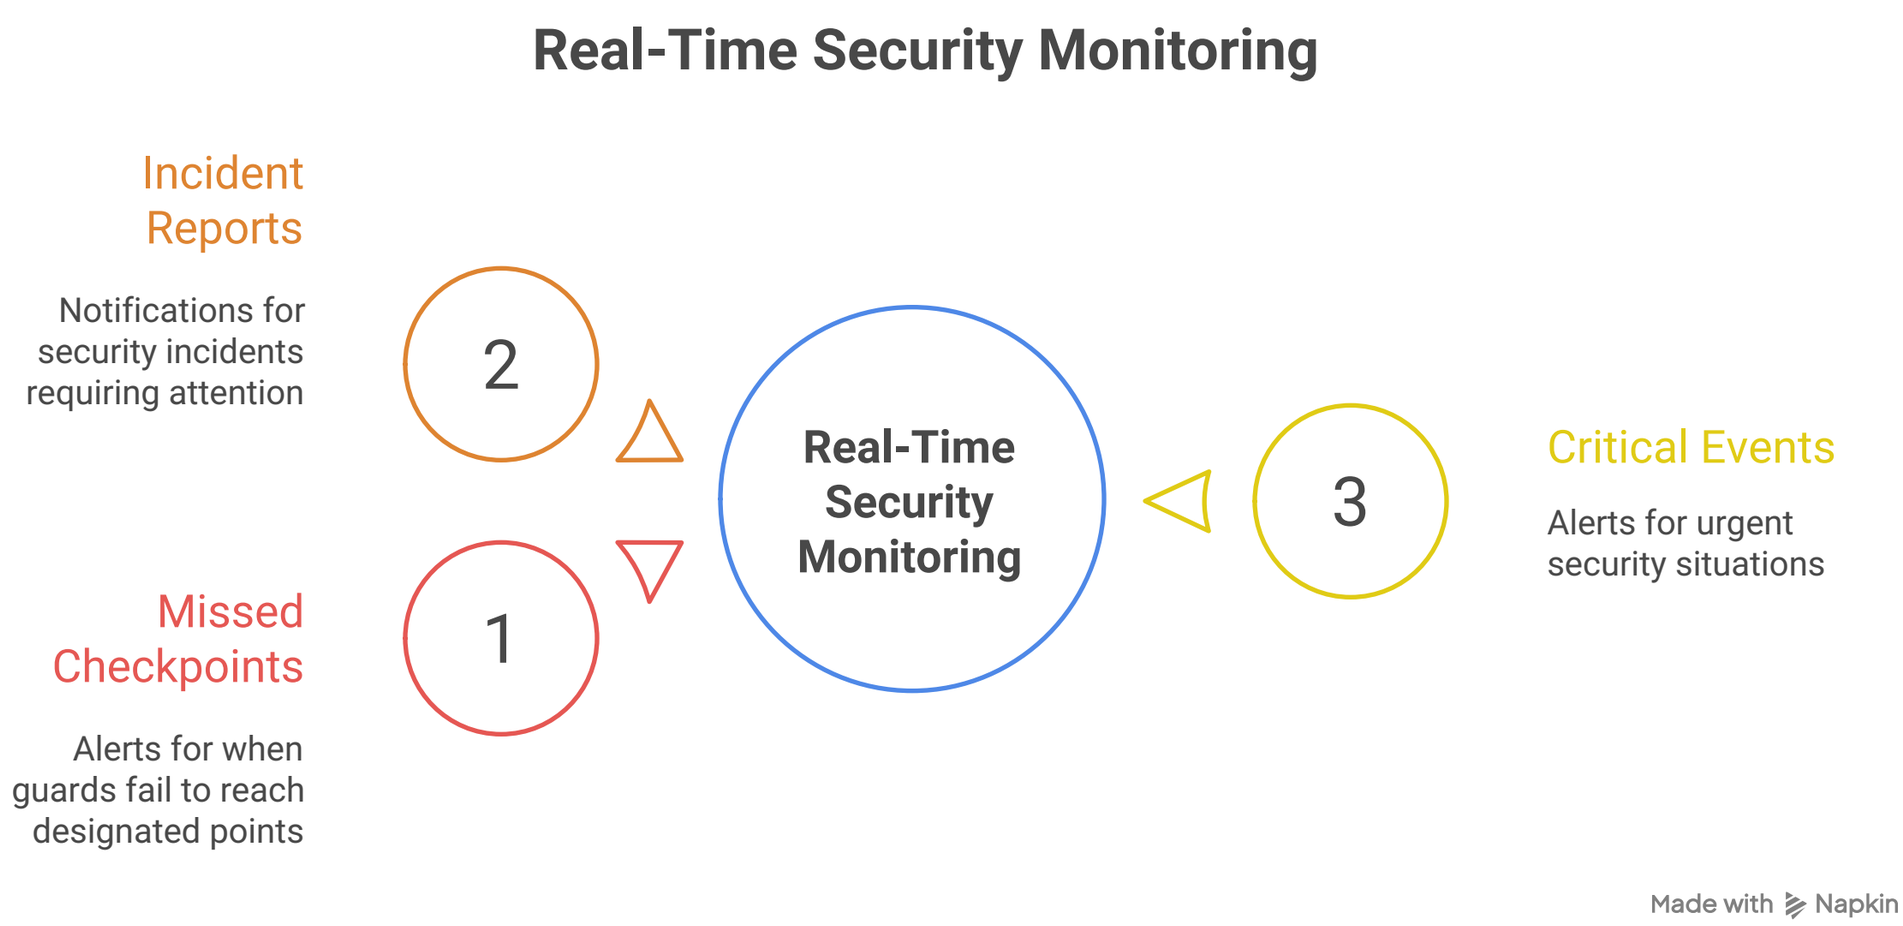
Key Features

Our virtual guard tour service includes the following key features:

- **Mobile Patrol App:** A user-friendly mobile application for security personnel (or designated employees) to conduct virtual patrols. The app is compatible with both iOS and Android devices.
- **QR Code/NFC Tag Scanning:** The app allows users to scan strategically placed QR codes or NFC tags throughout the property. These tags act as checkpoints, ensuring that patrols cover all designated areas.
- **Real-Time Reporting:** As checkpoints are scanned, data is transmitted in real-time to a secure cloud-based platform. This allows for immediate monitoring of patrol progress and any identified issues.
- **Photo and Video Documentation:** Users can capture photos and videos of any incidents or areas of concern encountered during the patrol. This provides valuable visual evidence for reporting and investigation purposes.
- **Incident Reporting:** The app allows users to easily report incidents, such as security breaches, maintenance issues, or safety hazards. These reports are automatically logged and can be escalated to the appropriate personnel.
- **GPS Tracking:** The app utilizes GPS tracking to verify the location of the patrol and ensure that designated areas are covered.
- **Customizable Patrol Schedules:** Patrol schedules can be customized to meet the specific needs of each property. This includes setting the frequency, duration, and route of patrols.
- **Automated Reporting:** Generate automated reports on patrol activity, incident reports, and other key metrics. These reports can be customized and delivered on a regular basis.

Made with Napkin

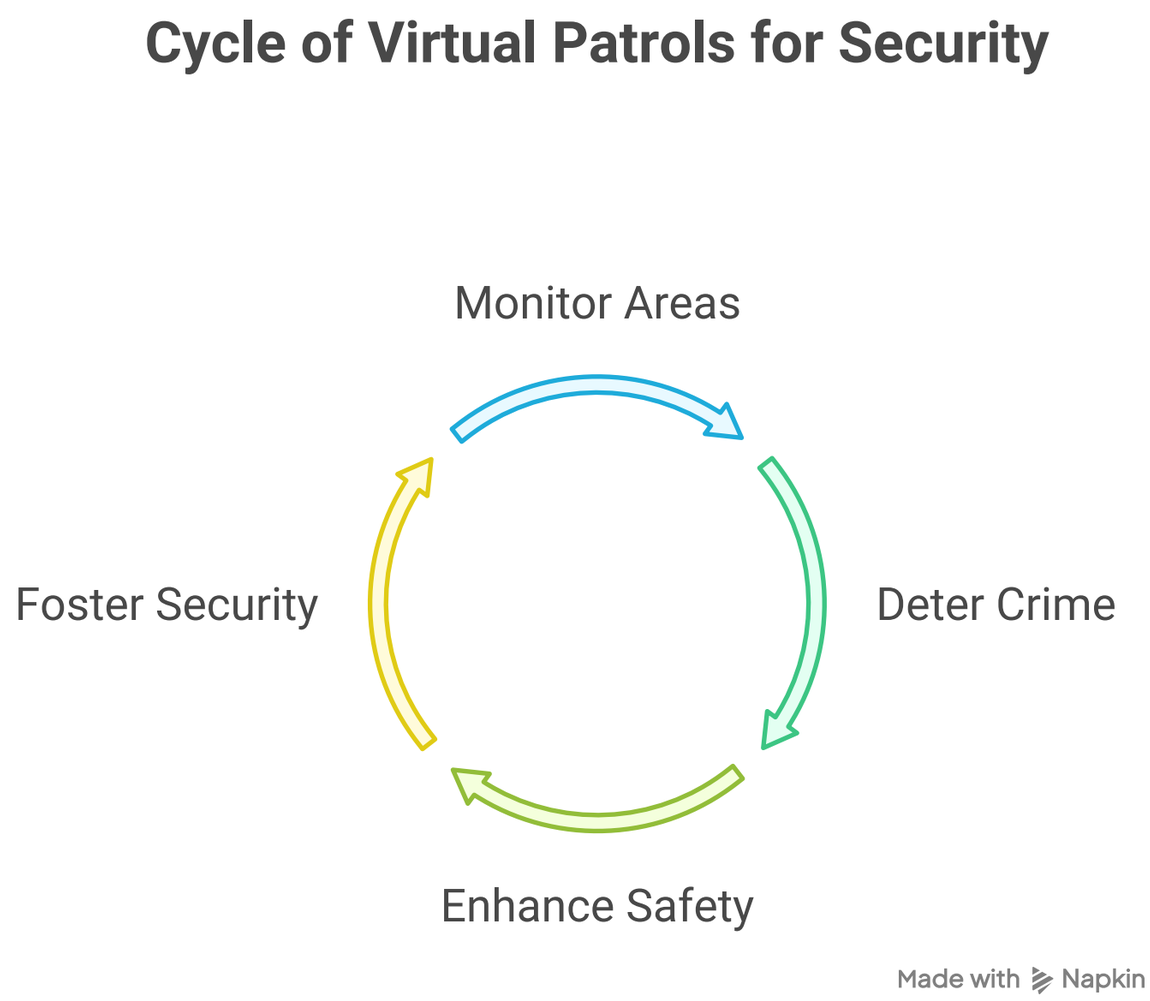
- **Cloud-Based Platform:** All data is stored securely in the cloud, providing easy access to patrol information from any device with an internet connection.
- **Alerts and Notifications:** Receive real-time alerts and notifications for missed checkpoints, incident reports, and other critical events.



Benefits of Virtual Guard Tours

Implementing our virtual guard tour service offers numerous benefits, including:

- **Cost Savings:** Significantly reduce security costs compared to traditional security guard services.
- **Enhanced Security:** Improve security by ensuring regular patrols and providing verifiable proof of patrol activity.
- **Increased Accountability:** Hold security personnel (or designated employees) accountable for completing patrols and reporting incidents.
- **Real-Time Visibility:** Gain real-time visibility into patrol activity and any identified issues.
- **Improved Incident Response:** Respond quickly and effectively to incidents with detailed reports and visual evidence.
- **Customizable Solution:** Tailor the service to meet the specific security needs of each property.
- **Easy Implementation:** The service is easy to implement and requires minimal training.
- **Scalability:** Easily scale the service to accommodate changes in property size or security needs.
- **Deterrent to Crime:** The presence of virtual patrols can act as a deterrent to crime.



Implementation Process

The implementation process for our virtual guard tour service is straightforward and efficient:

1. **Assessment:** We conduct an initial assessment of the property to identify key areas for patrol and determine the optimal placement of QR codes or NFC tags.

2. **Tag Installation:** We install QR codes or NFC tags at designated checkpoints throughout the property.

3. **App Setup and Training:** We set up the mobile patrol app on the devices of designated personnel and provide comprehensive training on its use.

4. **Schedule Configuration:** We configure patrol schedules based on the specific needs of the property.

5. **Go-Live:** The virtual guard tour service is activated, and patrols begin according to the established schedule.

6. **Ongoing Support:** We provide ongoing support and maintenance to ensure the service operates smoothly.

Pricing

Our virtual guard tour service is offered at a flat rate of **30 SGD per month**. This price includes:

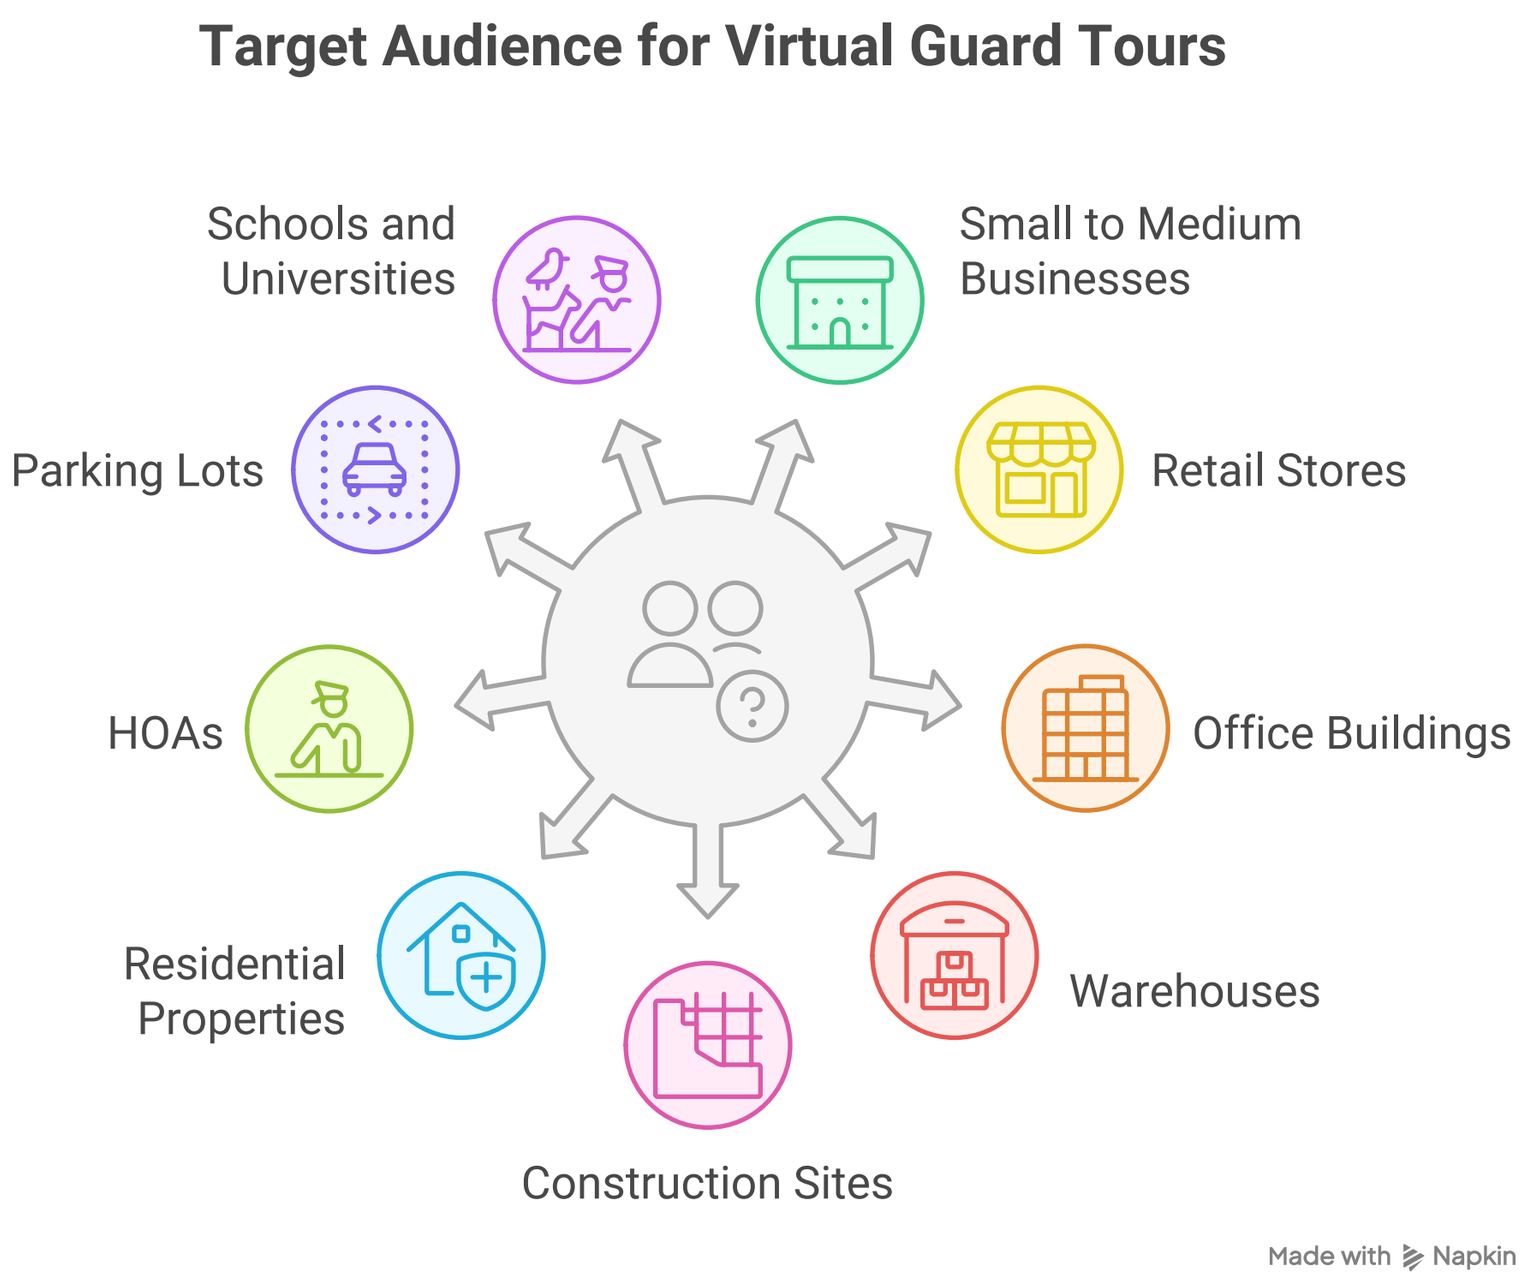
- Access to the mobile patrol app
- Cloud-based data storage and reporting
- Real-time alerts and notifications
- Ongoing support and maintenance

Note: The initial setup, including the assessment and tag installation, may incur a separate one-time fee. This will be discussed and agreed upon during the initial consultation.

Target Audience

This service is ideal for a wide range of businesses and property owners, including:

- Small to medium-sized businesses
- Retail stores
- Office buildings
- Warehouses
- Construction sites
- Residential properties
- HOAs (Homeowners Associations)
- Parking lots
- Schools and universities



Conclusion

Our virtual guard tour service offers a cost-effective and efficient way to enhance security and provide verifiable proof of patrols. At just 30 SGD per month, this service provides significant value and peace of mind. Contact us today to learn more about how our virtual guard tour service can benefit your business or property.
